CHAPTER 1: General Medical Knowledge & Hospital Terminology

1.1 Introduction

Healthcare awareness encompasses essential clinical knowledge regarding medical specialists, hospital departmental hierarchy, diagnostic modalities, emergency services, and foundational clinical terminology.

For a prospective B.Sc. Nursing student, understanding which specialist treats a specific organ or pathology, alongside deciphering universal hospital abbreviations, is vital for both scoring well in entrance examinations and practicing safely in clinical postings.

1.2 Medical Specialists and Their Fields

A medical specialist is a physician who has undergone advanced post-graduate residency and training to diagnose, manage, and prevent diseases related to a particular organ, physiological system, or patient population.

Medical Specialist	Field of Specialization & Scope of Practice
Cardiologist	Diseases of the heart and cardiovascular system
Neurologist	Diseases of the brain, spinal cord, and peripheral nerves
Neurosurgeon	Surgical management of brain, spine, and nervous system disorders
Nephrologist	Medical management of kidney diseases and renal disorders
Urologist	Surgical/medical diseases of the urinary tract & male reproductive system
Oncologist	Cancer diagnosis, chemotherapy, and tumor treatment
Dermatologist	Diseases of the skin, hair, and nails
Ophthalmologist	Diseases, disorders, and surgery of the eyes
Otolaryngologist (ENT)	Diseases of the ear, nose, throat, and head/neck structures
Pulmonologist	Diseases of the lungs, bronchial tree, and respiratory system
Gastroenterologist	Diseases of the digestive tract, stomach, intestines, and pancreas
Hepatologist	Specific disorders of the liver, gallbladder, and biliary tree
Paediatrician	Medical care and growth monitoring of infants, children, & adolescents
Gynaecologist	Diseases and conditions of the female reproductive system
Obstetrician	Pregnancy, antenatal care, childbirth (delivery), and puerperium
Psychiatrist	Diagnosis, psychopharmacology, and therapy of mental disorders
Orthopaedist	Diseases, fractures, and surgical correction of bones and joints

Medical Specialist	Field of Specialization & Scope of Practice
Endocrinologist	Hormonal imbalances and endocrine glands (thyroid, pancreas, pituitary)
Haematologist	Disorders of blood, bone marrow, and blood-forming organs
Rheumatologist	Autoimmune and inflammatory disorders affecting joints and connective tissues
Gerontologist	Scientific study of the biological and social processes of ageing
Geriatrician	Clinical and medical care tailored to older adults / elderly population
Dentist	General teeth and oral hygiene care
Periodontist	Diseases of the gums and supporting bone structures of teeth
Endodontist	Pathology of dental pulp and root canal treatments (RCT)
Proctologist	Surgical disorders of the rectum, anus, and colon
Andrologist	Male fertility, endocrine, and reproductive health
Allergist / Immunologist	Asthma, hypersensitivity reactions, allergies, and immune disorders
Infectious Disease Specialist	Complex viral, bacterial, fungal, and parasitic infections
Anaesthesiologist	Anaesthesia administration, sedation, and perioperative pain control
Radiologist	Diagnostic medical imaging interpretation (X-ray, USG, CT, MRI)
Pathologist	Laboratory analysis of biopsies, tissues, blood, and fluids
Epidemiologist	Patterns, transmission, etiology, and containment of diseases in populations
Entomologist	Scientific study of insects (vectors such as mosquitoes, ticks, fleas)

Crucial Exam Differences

1. Entomologist vs. Otolaryngologist

Entomologist: A zoologist/scientist who studies insects (biological vectors).
Otolaryngologist: A medical doctor specializing in Ear, Nose, and Throat (ENT) clinical conditions.

2. Nephrologist vs. Urologist

Nephrologist: Medical specialist who handles renal dysfunctions (kidney failure, dialysis, glomerulonephritis).
Urologist: Surgical specialist handling anatomical and surgical diseases of the entire urinary tract (both sexes) and male reproductive tract (kidney stones, prostate, bladder tumours).

3. Cardiologist vs. Cardiothoracic Surgeon

Cardiologist: Diagnoses and treats heart conditions non-surgically or via catheterization (e.g., angioplasty, medications).
Cardiothoracic Surgeon: Performs open surgical procedures on heart valves, bypass grafting (CABG), lungs, and chest cavity.

4. Oncologist vs. Pathologist

Oncologist: Directly directs cancer clinical therapy, staging, and patient oncology care.
Pathologist: Examines histological specimens, cells (cytology), and lab values behind the scenes to establish definitive diagnoses.

5. Obstetrician vs. Gynaecologist

Obstetrician: Manages antenatal mother health, labor, delivery, and post-partum care.
Gynaecologist: Manages conditions affecting female non-pregnant reproductive organs throughout life.

Memory Matrix: Quick Review

Heart: Cardiologist	**Kidneys:** Nephrologist
Cancer / Tumors: Oncologist	**Lungs / Respiration:** Pulmonologist
Pediatrics / Children: Paediatrician	**Skin / Integument:** Dermatologist
Eyes / Vision: Ophthalmologist	**Nervous System:** Neurologist
Skeletal System: Orthopaedist	**Ear, Nose, Throat:** Otolaryngologist
Blood Pathology: Haematologist	**Endocrine / Hormones:** Endocrinologist
Insects / Vector Biology: Entomologist	**Elderly Care:** Geriatrician

1.3 Important Hospital Departments

Modern multi-specialty hospitals are structured into interdependent administrative, clinical, diagnostic, and support departments that guarantee streamlined patient care.

1. Outpatient Department (OPD)

Provides medical consultation, preventive check-ups, and outpatient therapies to patients who do not require overnight admission. (*Example:* Clinical visit for acute pharyngitis or routine diabetic follow-up).

2. Inpatient Department (IPD)

Dedicated wards and private rooms for admitted individuals who necessitate overnight clinical surveillance, IV therapy, recovery, or surgical intervention.

3. Intensive Care Unit (ICU)

A heavily equipped ward dedicated to life support, invasive hemodynamic monitoring, and 1:1 or 1:2 nursing care for critically ill patients facing life-threatening emergencies.

4. Emergency Department (ED / Casualty)

Open 24/7 to triage, stabilize, and immediately treat acute trauma, cardiac arrest, stroke, and unexpected health emergencies.

5. Operation Theatre (OT / OR)

A sterile, environmentally controlled surgical suite where elective and emergency operative procedures are conducted under strict aseptic technique.

6. Central Laboratory Department

Analyzes body fluids, blood specimens, urine, and cultures (Pathology, Biochemistry, and Microbiology) to deliver quantitative diagnostic data.

7. Radiology / Imaging Department

Furnishes internal visualization using diagnostic physics modalities including Plain Radiography (X-ray), Ultrasound (USG), Computed Tomography (CT), and MRI.

8. Pharmacy Department

Responsible for hospital drug formulary procurement, clinical drug dispensing, verifying medication orders, compounding, and narcotics tracking.

9. Dietary & Clinical Nutrition Department

Plans, formulates, and produces therapeutic meals meeting individualized caloric and disease-specific dietary requirements (e.g., renal diet, diabetic diet, salt-restricted diet).

10. Medical Records Department (MRD)

Safeguards, indexes, archives, and organizes medico-legal patient health records and histories in compliance with statutory privacy guidelines.

11. Central Sterile Services Department (CSSD)

The nerve center for decontamination, inspection, packaging, autoclaving (steam sterilization), storage, and supply of surgical packs and instruments throughout the hospital.

12. Blood Bank & Transfusion Services

Screens, collects, cross-matches, stores, and separates donated human blood into packed red cells (PRBC), platelets, and fresh frozen plasma (FFP).

13. Physiotherapy & Rehabilitation

Focuses on neuromuscular rehabilitation, post-stroke mobilization, chest physiotherapy, and restoring functional independence after injury.

14. Infection Prevention & Control Department (HICC)

Monitors hospital-acquired infections (HAIs), enforces hand hygiene compliance, establishes antibiotic stewardship protocols, and ensures isolation precautions.

15. Mortuary

Specially refrigerated anatomical facility for the dignified preservation of deceased persons prior to post-mortem examination or transfer to families.

1.4 Common Hospital Abbreviations & Acronyms

Entrance questions regularly test standardized clinical acronyms. Familiarity with their precise meanings is essential.

Abbreviation	Expanded Form	Clinical Significance / Context
ICU	Intensive Care Unit	Critical care unit for life-threatening illness
OPD	Outpatient Department	Day-clinic consultation without admission
IPD	Inpatient Department	Admitted patient wards
OT	Operation Theatre	Aseptic surgical intervention suite
ECG	Electrocardiogram	Electrical rhythm and conduction of heart
EEG	Electroencephalogram	Electrical wave activity of the brain
MRI	Magnetic Resonance Imaging	High-definition soft-tissue imaging via magnetism
CT	Computed Tomography	Cross-sectional 3D X-ray anatomical slices
CPR	Cardiopulmonary Resuscitation	Life-saving emergency compressions & ventilation
BP	Blood Pressure	Vascular arterial pressure (Systolic / Diastolic)
HR	Heart Rate	Cardiac cycles counted per minute (bpm)
RR	Respiratory Rate	Inspirations and expirations counted per minute
SpO_2	Peripheral Oxygen Saturation	Percentage of oxygenated hemoglobin via pulse oximetry
CBC	Complete Blood Count	Hemogram examining all major blood cell lines
Hb	Haemoglobin	Oxygen-binding metalloprotein in erythrocytes
RBC	Red Blood Cell (Erythrocyte)	Oxygen-carrying non-nucleated blood cell
WBC	White Blood Cell (Leukocyte)	Immune defending cell line
IV	Intravenous	Administration directly into a venous channel (90°/15°)
IM	Intramuscular	Injection delivered directly into muscle tissue (90°)

Abbreviation	Expanded Form	Clinical Significance / Context
SC	Subcutaneous	Injection delivered into adipose layer below dermis (45°)
ID	Intradermal	Injection into dermis layer (e.g. Mantoux test) (10°–15°)
BLS	Basic Life Support	First-line pre-hospital airway and chest compression protocol
ACLS	Advanced Cardiovascular Life Support	Advanced pharmacology, intubation, & defibrillation protocol
PPE	Personal Protective Equipment	Gowns, gloves, N95 masks, and face shields
BMW	Biomedical Waste	Hazardous biological waste segregation protocol
CSSD	Central Sterile Services Department	Sterilization depot for instruments
NICU	Neonatal Intensive Care Unit	Critical nursery care for newborns (< 28 days)
PICU	Paediatric Intensive Care Unit	Intensive care for infants and children up to adolescence
SICU	Surgical Intensive Care Unit	Critical care for post-operative surgical cases
MICU	Medical Intensive Care Unit	Critical care for acute medical emergencies
ENT	Ear, Nose, and Throat	Otolaryngology section
OPV	Oral Polio Vaccine	Sabin attenuated live oral poliovirus vaccine
ORS	Oral Rehydration Solution	Electrolyte-glucose water solution against dehydration
WHO	World Health Organization	United Nations global public health body (Geneva)
UNICEF	United Nations Children's Fund	International agency providing humanitarian pediatric aid
INC	Indian Nursing Council	National statutory body regulating nursing curriculum in India
ANM	Auxiliary Nurse Midwife	Grassroots community healthcare worker course

Abbreviation	Expanded Form	Clinical Significance / Context
GNM	General Nursing and Midwifery	3-year diploma course in nursing and clinical care
B.Sc.	Bachelor of Science	4-year professional undergraduate degree program
MBBS	Bachelor of Medicine, Bachelor of Surgery	Primary medical undergraduate degree in India

Diagnostic Imaging & Electrophysiology Distinction

ECG vs. EEG: ECG monitors cardiac electrophysiology (Heart rate, myocardial infarction, arrhythmias); EEG detects cortical neural oscillations (Brain seizures, sleep cycles, encephalopathy).
MRI vs. CT: MRI utilizes strong magnetic fields (Tesla) and RF pulses without ionizing radiation (ideal for soft tissues and central nervous system); CT utilizes computerized rotating X-ray beams producing cross-sectional slices with ionizing radiation (ideal for acute trauma and bony architecture).

1.5 Core Healthcare Terminology

1. Health (WHO Definition)

A state of complete physical, mental, and social well-being and not merely the absence of disease or infirmity (Established in the WHO Constitution, 1948).

2. Disease

Any pathological condition of an organism or part that impairs normal physiological or psychological functioning, typically evidenced by characteristic signs and symptoms.

3. Diagnosis vs. Prognosis

Diagnosis: The formal clinical determination of the identity and nature of a disease through signs, symptoms, history, and laboratory workups.
Prognosis: The forecasted clinical trajectory, expected outcome, and likelihood of recovery or mortality from the diagnosed disease.

4. Symptom vs. Sign

Symptom: Subjective clinical complaint experienced and verbalized exclusively by the patient (e.g., headache, dizziness, nausea, chest soreness).
Sign: Objective, measurable clinical evidence discovered and quantified by the examiner (e.g., clinical pyrexia 102°F, hypertension 150/90 mmHg, edema, pallor).

5. Infection vs. Inflammation

Infection: Colonization and destructive proliferation of pathogenic microorganisms within host biological tissues.
Inflammation: The body's localized vascular defensive response to physical trauma, foreign bodies, or pathogens (Signs: *Rubor*/redness, *Calor*/heat, *Tumor*/swelling, *Dolor*/pain, and *Functio laesa*/loss of function).

6. Nosocomial Infection (HAI)

An infection acquired by a patient in a healthcare setting that was neither present nor incubating at the time of admission (Healthcare-Associated Infection, typically manifesting after 48 hours of hospitalization).

7. Immunity

The biological capability of the host immune system to detect, neutralize, and remember harmful non-self antigens, toxins, and pathogenic microbial agents.

8. Sterilization vs. Disinfection vs. Antiseptic

Sterilization: Absolute elimination or eradication of all forms of living microbial life, crucially including resistant bacterial endospores (e.g., Autoclaving at 121°C for 15 psi).
Disinfection: Chemical or physical eradication of pathogenic vegetative microorganisms from *inanimate non-living surfaces* (does not reliably kill all endospores).
Antiseptic: Non-toxic chemical antimicrobial formulated specifically for application on *living human tissues, skin, or mucus membranes* to inhibit microflora (e.g., Betadine, Chlorhexidine).

9. Antibiotic

An antimicrobial chemical agent derived from biological organisms or synthesized to destroy or inhibit the growth of susceptible bacterial species. *Crucial Note: Antibiotics exert zero antiviral efficacy and cannot treat common colds or influenza.*

10. Analgesic vs. Antipyretic

Analgesic: Pharmacological agent specifically administered to alleviate pain without producing loss of consciousness (e.g., Tramadol, Paracetamol).
Antipyretic: Pharmacological agent acting on the hypothalamus to decrease elevated body temperature and mitigate fever (e.g., Paracetamol).

11. Anaemia, Oedema, Cyanosis & Haemorrhage

Anaemia: Pathological decrease below physiological normal in red blood cells or circulating hemoglobin mass.
Oedema: Abnormal, clinically apparent accumulation of interstitial fluid inside interstitial soft-tissue compartments.
Cyanosis: Dusky bluish coloration of the skin, nailbeds, and mucous membranes caused by excessive unoxygenated/deoxygenated hemoglobin (> 5 g/dL).
Haemorrhage: Acute or chronic extravasation and escape of blood from ruptured arterial, venous, or capillary vascular beds.

1.6 The NURSE Acronym & Professional Ethos

In academic nursing foundational curricula and entrance entrance materials, mnemonics are commonly utilized to highlight the character and dedication expected in this profession:

Educational Mnemonic: NURSE

N — **Nobility** (Upholding moral integrity & honor)
U — **Understanding** (Deep perception of patient pain & psychology)
R — **Responsibility** (Accountability in administering treatments & orders)
S — **Sympathy** / **Sincerity** (Genuine care and benevolent purpose)
E — **Efficiency** (Prompt clinical capability and precision)

Clinical Ethics: Empathy vs. Sympathy

Sympathy: Experiencing sorrow, pity, or emotional distress on behalf of someone else's misfortune ("I feel sad for what you are going through"). This creates emotional attachment that can impede clinical objectivity.

Empathy: The cognitive and therapeutic ability to understand, recognize, and enter another person's feelings and perspective while maintaining calm professional boundaries and objective clinical judgment ("I understand the difficulty you are facing, and I am here to assist your recovery").

SECTION 1: GENERAL MEDICAL GK & HOSPITAL TERMINOLOGY (सामान्य चिकित्सा ज्ञान एवं अस्पताल शब्दावली)

40 MCQs • Q.01 TO Q. 40

Q.01 Which specialist treats diseases of the heart?
हृदय के रोगों का इलाज कौन-सा विशेषज्ञ करता है?

(A) Neurologist (न्यूरोलॉजिस्ट)
(B) Dermatologist (त्वचा रोग विशेषज्ञ)
(C) Cardiologist (हृदय रोग विशेषज्ञ)
(D) Nephrologist (गुर्दा रोग विशेषज्ञ)

Q.02 Which specialist treats cancer?
कैंसर का इलाज कौन-सा विशेषज्ञ करता है?

(A) Oncologist (कैंसर रोग विशेषज्ञ)
(B) Orthopaedist (हड्डी रोग विशेषज्ञ)
(C) Ophthalmologist (नेत्र रोग विशेषज्ञ)
(D) Paediatrician (बाल रोग विशेषज्ञ)

Q.03 What is the full form of ICU?
ICU का पूरा नाम क्या है?

(A) Internal Clinical Unit
(B) Intensive Care Unit
(C) International Care Unit
(D) Immediate Cure Unit

Q.04 Which specialist treats diseases of the kidneys?
गुर्दे की बीमारियों का इलाज कौन करता है?

(A) Cardiologist (हृदय रोग विशेषज्ञ)
(B) Pulmonologist (फेफड़ों का विशेषज्ञ)
(C) Neurologist (तंत्रिका रोग विशेषज्ञ)
(D) Nephrologist (गुर्दा रोग विशेषज्ञ)

Q.05 What is the full form of OPD?
OPD का पूरा नाम क्या है?

(A) Outpatient Department
(B) Operation Patient Division
(C) Outdoor Pharmacy Department
(D) Official Patient Division

Q.06 Which specialist treats diseases of the skin?
त्वचा की बीमारियों का इलाज कौन करता है?

(A) Haematologist (रक्त रोग विशेषज्ञ)
(B) Dermatologist (त्वचा रोग विशेषज्ञ)
(C) Endocrinologist (हार्मोन विशेषज्ञ)
(D) Gastroenterologist (पाचन तंत्र विशेषज्ञ)

Q.07 What is the full form of ECG?
ECG का पूरा नाम क्या है?

(A) Electrical Cardiac Group
(B) Electro Clinical Graph
(C) Electrocardiogram
(D) Electronic Circulation Graph

Q.08 Which specialist treats diseases of the lungs?
फेफड़ों की बीमारियों का इलाज कौन करता है?

(A) Urologist (मूत्र रोग विशेषज्ञ)
(B) Oncologist (कैंसर रोग विशेषज्ञ)
(C) Nephrologist (गुर्दा रोग विशेषज्ञ)
(D) Pulmonologist (फेफड़ों का विशेषज्ञ)

Q.09 What is the full form of EEG?
EEG का पूरा नाम क्या है?

(A) Electroencephalogram
(B) Electrocardiogram
(C) Emergency Examination Graph
(D) Electronic Energy Graph

Q.10 Which specialist treats children?
बच्चों का इलाज कौन-सा विशेषज्ञ करता है?

(A) Gynaecologist (स्त्री रोग विशेषज्ञ)
(B) Paediatrician (बाल रोग विशेषज्ञ)
(C) Cardiologist (हृदय रोग विशेषज्ञ)
(D) Dermatologist (त्वचा रोग विशेषज्ञ)

Q.11 Which department generally manages patients' dietary requirements in a hospital?
अस्पताल में मरीजों के आहार की व्यवस्था सामान्यतः कौन-सा विभाग करता है?

(A) Radiology Department
(B) Pharmacy Department
(C) Dietary Department
(D) Medical Records Department

Q.12 What is the full form of MRI?
MRI का पूरा नाम क्या है?

(A) Medical Radiation Index
(B) Magnetic Radio Inspection
(C) Medical Resonance Instrument
(D) Magnetic Resonance Imaging

Q.13 Which specialist treats diseases of the brain and nerves?
मस्तिष्क और नसों की बीमारियों का इलाज कौन करता है?

(A) Neurologist (तंत्रिका रोग विशेषज्ञ)
(B) Dermatologist (त्वचा रोग विशेषज्ञ)
(C) Nephrologist (गुर्दा रोग विशेषज्ञ)
(D) Dentist (दंत चिकित्सक)

Q.14 What is the full form of CPR?
CPR का पूरा नाम क्या है?

(A) Clinical Patient Recovery
(B) Cardiopulmonary Resuscitation
(C) Cardiac Pressure Regulation
(D) Critical Pulse Response

Q.15 Which specialist treats diseases of the eyes?
आँखों की बीमारियों का इलाज कौन करता है?

(A) Otolaryngologist
(B) Cardiologist
(C) Ophthalmologist
(D) Nephrologist

Q.16 What is the full form of IPD?
IPD का पूरा नाम क्या है?

(A) Intensive Pharmacy Department
(B) Internal Patient Division
(C) Immediate Patient Department
(D) Inpatient Department

NURSING STUDY ZONE

Q.17 Which specialist treats hormonal disorders?
हार्मोन संबंधी विकारों का इलाज कौन करता है?

(A) Endocrinologist (अंतःस्रावी ग्रंथि विशेषज्ञ)
(B) Orthopaedist (हड्डी रोग विशेषज्ञ)
(C) Ophthalmologist (नेत्र रोग विशेषज्ञ)
(D) Pulmonologist (फेफड़ों का विशेषज्ञ)

Q.18 Which specialist treats diseases of the blood?
रक्त संबंधी बीमारियों का इलाज कौन करता है?

(A) Urologist
(B) Haematologist
(C) Dermatologist
(D) Psychiatrist

Q.19 Who studies insects?
कीटों का अध्ययन कौन करता है?

(A) Pathologist
(B) Cardiologist
(C) Entomologist
(D) Neurologist

Q.20 What is the full form of PPE?
PPE का पूरा नाम क्या है?

(A) Patient Protection Examination
(B) Personal Patient Equipment
(C) Professional Protection Element
(D) Personal Protective Equipment

Q.21 What is a nosocomial infection?
नोसोकोमियल संक्रमण क्या है?

(A) An infection acquired in a hospital (अस्पताल में प्राप्त संक्रमण)
(B) An inherited disease (वंशानुगत रोग)
(C) A nutritional disorder (पोषण संबंधी विकार)
(D) A congenital condition (जन्मजात स्थिति)

Q.22 Which specialist treats diseases of the digestive system?
पाचन तंत्र की बीमारियों का इलाज कौन करता है?

(A) Neurologist
(B) Gastroenterologist
(C) Ophthalmologist
(D) Haematologist

Q.23 What does BP stand for?
BP का पूरा नाम क्या है?

(A) Blood Platelet
(B) Body Pressure
(C) Blood Pressure
(D) Breathing Pulse

Q.24 Which specialist treats diseases of bones and joints?
हड्डियों और जोड़ों की बीमारियों का इलाज कौन करता है?

(A) Oncologist
(B) Cardiologist
(C) Nephrologist
(D) Orthopaedist

Q.25 What is the full form of CBC?
CBC का पूरा नाम क्या है?

(A) Complete Blood Count
(B) Clinical Body Check
(C) Common Blood Classification
(D) Cardiac Blood Control

Q.26 Which department performs diagnostic imaging such as X-rays?
एक्स-रे जैसी जाँच किस विभाग में की जाती है?

(A) Pharmacy Department
(B) Radiology Department
(C) Dietary Department
(D) Laundry Department

Q.27 What is the main function of the CSSD?
CSSD का मुख्य कार्य क्या है?

(A) Preparing patient meals
(B) Managing hospital accounts
(C) Processing and sterilizing reusable medical instruments
(D) Conducting eye examinations

Q.28 What is the full form of BLS?
BLS का पूरा नाम क्या है?

(A) Blood Level System
(B) Basic Laboratory Service
(C) Body Life Support
(D) Basic Life Support

Q.29 Which specialist treats diseases of the urinary tract and performs related surgeries?
मूत्र मार्ग की बीमारियों और उनसे संबंधित सर्जरी का इलाज कौन करता है?

(A) Urologist
(B) Neurologist
(C) Dermatologist
(D) Endocrinologist

Q.30 What does IV stand for in medical terminology?
चिकित्सा में IV का अर्थ क्या है?

(A) Internal Vision
(B) Intravenous
(C) Immediate Ventilation
(D) Inpatient Visit

Q.31 Which specialist provides anaesthesia during surgery?
सर्जरी के दौरान एनेस्थीसिया कौन देता है?

(A) Pathologist
(B) Radiologist
(C) Anaesthesiologist
(D) Entomologist

Q.32 What is the full form of NICU?
NICU का पूरा नाम क्या है?

(A) National Intensive Care Unit
(B) Neonatal Internal Care Unit
(C) Newborn Infection Control Unit
(D) Neonatal Intensive Care Unit

Q.33 What is a symptom?
लक्षण (Symptom) क्या है?

(A) A problem experienced and reported by a patient (मरीज द्वारा महसूस और बताया गया कष्ट)
(B) A laboratory instrument
(C) A hospital department
(D) A surgical procedure

NURSING STUDY ZONE

Q.34 **What is a sign in medicine?**
चिकित्सा में Sign का क्या अर्थ है?

(A) A patient's personal opinion
(B) An observable or measurable finding (देखा या मापा जा सकने वाला संकेत)
(C) A prescription
(D) A hospital admission form

Q.35 **Which process destroys all forms of microbial life, including bacterial spores?**
कौन-सी प्रक्रिया बैक्टीरियल स्पोर सहित सभी प्रकार के सूक्ष्मजीवों को नष्ट करती है?

(A) Cleaning
(B) Routine washing
(C) Sterilization
(D) Dusting

Q.36 **Which substance is used on living tissue to reduce microorganisms?**
जीवित ऊतकों पर सूक्ष्मजीवों को कम करने के लिए किसका उपयोग किया जाता है?

(A) Detergent only
(B) Lubricant
(C) Paint
(D) Antiseptic

Q.37 **Which medicine is used to reduce fever?**
बुखार कम करने वाली दवा को क्या कहते हैं?

(A) Antipyretic
(B) Antacid
(C) Antiseptic
(D) Anticoagulant

Q.38 **Which medicine is used to relieve pain?**
दर्द कम करने वाली दवा को क्या कहते हैं?

(A) Antibiotic
(B) Analgesic
(C) Antiseptic
(D) Antihistamine

Q.39 **What does SpO_2 generally represent?**
SpO_2 सामान्यतः क्या दर्शाता है?

(A) Blood glucose level
(B) Body temperature
(C) Peripheral oxygen saturation
(D) Blood platelet count

Q.40 **Which organ is primarily responsible for filtering blood and forming urine?**
रक्त को छानने और मूत्र बनाने का मुख्य कार्य कौन-सा अंग करता है?

(A) Liver
(B) Heart
(C) Pancreas
(D) Kidney

SECTION 2: HISTORY OF NURSING & STATUTORY BODIES (नर्सिंग का इतिहास एवं वैधानिक निकाय) — 30 MCQs • Q.41 TO Q.70

Q.41 **Who is known as the founder of modern nursing?**
आधुनिक नर्सिंग की संस्थापक के रूप में किसे जाना जाता है?

(A) Florence Nightingale
(B) Marie Curie
(C) Mother Teresa
(D) Elizabeth Blackwell

Q.42 **What was Florence Nightingale's popular nickname?**
फ्लोरेंस नाइटिंगेल का प्रसिद्ध उपनाम क्या था?

(A) Mother of Medicine
(B) The Lady with the Lamp
(C) Queen of Surgery
(D) Lady of Science

Q.43 **When was Florence Nightingale born?**
फ्लोरेंस नाइटिंगेल का जन्म कब हुआ था?

(A) 8 May 1828
(B) 7 April 1820
(C) 12 May 1820
(D) 12 June 1830

Q.44 **International Nurses Day is celebrated on:**
अंतरराष्ट्रीय नर्स दिवस कब मनाया जाता है?

(A) 8 May
(B) 7 April
(C) 1 December
(D) 12 May

Q.45 **In which year was the Nightingale Training School for Nurses established?**
नाइटिंगेल ट्रेनिंग स्कूल फॉर नर्सेज की स्थापना किस वर्ष हुई थी?

(A) 1860
(B) 1850
(C) 1947
(D) 1901

Q.46 **The Nightingale Training School was established at:**
नाइटिंगेल ट्रेनिंग स्कूल कहाँ स्थापित किया गया था?

(A) Oxford Hospital
(B) St. Thomas' Hospital, London
(C) Geneva Hospital
(D) Paris Medical College

Q.47 **Florence Nightingale became famous for her nursing work during which war?**
फ्लोरेंस नाइटिंगेल किस युद्ध के दौरान अपनी नर्सिंग सेवाओं के लिए प्रसिद्ध हुईं?

(A) First World War
(B) Second World War
(C) Crimean War
(D) Vietnam War

Q.48 **The Indian Nursing Council Act was enacted in:**
इंडियन नर्सिंग काउंसिल एक्ट किस वर्ष पारित हुआ?

(A) 1935
(B) 1950
(C) 1962
(D) 1947

Q.49 **In which year was the Indian Nursing Council established?**
इंडियन नर्सिंग काउंसिल की स्थापना किस वर्ष हुई थी?

(A) 1949
(B) 1947
(C) 1956
(D) 1965

Q.50 **Where is the headquarters of the Indian Nursing Council?**
इंडियन नर्सिंग काउंसिल का मुख्यालय कहाँ है?

(A) Mumbai
(B) New Delhi
(C) Kolkata
(D) Chennai

Q.51 **What is an important objective of the Indian Nursing Council?**
इंडियन नर्सिंग काउंसिल का एक प्रमुख उद्देश्य क्या है?

(A) Manufacturing medicines
(B) Managing railway hospitals
(C) Promoting appropriate standards of nursing education
(D) Conducting all hospital surgeries

NURSING STUDY ZONE

Q.52 **Who is associated with the origin of the Red Cross movement?**
रेड क्रॉस आंदोलन की शुरुआत से किसका नाम जुड़ा है?

(A) Louis Pasteur
(B) Edward Jenner
(C) Alexander Fleming
(D) Henry Dunant

Q.53 **Henry Dunant was a citizen of which country?**
हेनरी ड्यूनां किस देश के नागरिक थे?

(A) Switzerland
(B) France
(C) Germany
(D) Italy

Q.54 **World Red Cross and Red Crescent Day is observed on:**
विश्व रेड क्रॉस और रेड क्रिसेंट दिवस कब मनाया जाता है?

(A) 12 May
(B) 8 May
(C) 7 April
(D) 5 June

Q.55 **The experiences of Henry Dunant during which battle helped inspire the Red Cross movement?**
किस युद्ध के दौरान हेनरी ड्यूनां के अनुभवों ने रेड क्रॉस आंदोलन को प्रेरित किया?

(A) Battle of Waterloo
(B) Battle of Plassey
(C) Battle of Solferino
(D) Battle of Panipat

Q.56 **The first Nobel Peace Prize was awarded in which year?**
पहला नोबेल शांति पुरस्कार किस वर्ष दिया गया था?

(A) 1895
(B) 1010
(C) 1945
(D) 1901

Q.57 **Which organization is primarily associated with international public health?**
अंतरराष्ट्रीय सार्वजनिक स्वास्थ्य से मुख्य रूप से कौन-सा संगठन जुड़ा है?

(A) WHO
(B) INC
(C) CSSD
(D) OPD

Q.58 **What is the full form of UNICEF?**
UNICEF का पूरा नाम क्या है?

(A) United Nations International Council for Education
(B) United Nations Children's Fund
(C) Universal National Institute for Child Education
(D) United Nations Centre for Infection

Q.59 **Which organization is primarily associated with nursing education standards at the national level in India?**
भारत में राष्ट्रीय स्तर पर नर्सिंग शिक्षा के मानकों से मुख्य रूप से कौन-सी संस्था जुड़ी है?

(A) UNICEF
(B) WHO alone
(C) Indian Nursing Council
(D) Indian Red Cross Society alone

Q.60 **Which organization is associated with biomedical and health research in India?**
भारत में जैव-चिकित्सा और स्वास्थ्य अनुसंधान से कौन-सी संस्था जुड़ी है?

(A) INC
(B) UNICEF
(C) CSSD
(D) Indian Council of Medical Research

Q.61 **What is the main role of a State Nursing Council?**
राज्य नर्सिंग काउंसिल की मुख्य भूमिका क्या है?

(A) Performing state-level nursing registration and regulatory functions under applicable law
(B) Manufacturing all medicines
(C) Conducting every medical examination
(D) Managing international health programmes

Q.62 **Which environmental factor did Florence Nightingale emphasize for patient recovery?**
फ्लोरेंस नाइटिंगेल ने मरीजों के स्वास्थ्य लाभ के लिए किस पर्यावरणीय कारक पर जोर दिया?

(A) Loud surroundings
(B) Cleanliness and fresh air
(C) Poor ventilation
(D) Overcrowding

Q.63 **Which of the following is an important contribution of Florence Nightingale?**
फ्लोरेंस नाइटिंगेल का एक महत्वपूर्ण योगदान क्या था?

(A) Discovery of insulin
(B) Discovery of penicillin
(C) Improvement of nursing education and hospital sanitation
(D) Discovery of blood groups

Q.64 **Which organization promotes children's health, nutrition and education internationally?**
अंतरराष्ट्रीय स्तर पर बच्चों के स्वास्थ्य, पोषण और शिक्षा को बढ़ावा देने वाली संस्था कौन-सी है?

(A) INC
(B) CSSD
(C) OPD
(D) UNICEF

Q.65 **Which organization provides humanitarian assistance during disasters and emergencies as part of the Red Cross movement?**
रेड क्रॉस आंदोलन के अंतर्गत आपदाओं और आपात स्थितियों में मानवीय सहायता कौन प्रदान करता है?

(A) Red Cross and Red Crescent movement
(B) Radiology Department
(C) Medical Records Department
(D) Pharmacy Department only

Q.66 **Which of the following is an important responsibility of a professional nurse?**
एक पेशेवर नर्स की महत्वपूर्ण जिम्मेदारी कौन-सी है?

(A) Ignoring patient concerns
(B) Protecting patient dignity and safety
(C) Sharing confidential records publicly
(D) Performing procedures without appropriate authorization

Q.67 **The title "The Lady with the Lamp" is associated with:**
"The Lady with the Lamp" उपनाम किससे संबंधित है?

(A) Clara Barton
(B) Henry Dunant
(C) Florence Nightingale
(D) Marie Curie

NURSING STUDY ZONE

Q.68 **Which year is associated with the establishment of the Nightingale Training School?**
नाइटिंगेल ट्रेनिंग स्कूल की स्थापना किस वर्ष हुई थी?

(A) 1947 (B) 1901
(C) 1820 (D) 1860

Q.69 **Which of the following is a humanitarian activity of the Red Cross movement?**
रेड क्रॉस आंदोलन की मानवीय गतिविधि कौन-सी है?

(A) Disaster relief (B) Selling hospital equipment for profit only
(C) Conducting commercial advertising only (D) Manufacturing all antibiotics

Q.70 **Which date is correctly matched with International Nurses Day?**
अंतरराष्ट्रीय नर्स दिवस की सही तिथि कौन-सी है?

(A) 8 May (B) 12 May
(C) 7 April (D) 1 December

SECTION 3: FIRST AID & EMERGENCY RESPONSE (प्राथमिक उपचार एवं आपातकालीन प्रतिक्रिया) 40 MCQs • Q.71 TO Q.110

Q.71 **What is the first important step after a dog bite?**
कुत्ते के काटने के बाद पहला महत्वपूर्ण कदम क्या है?

(A) Apply chilli powder (B) Tie the wound tightly
(C) Wash the wound with soap and running water (D) Ignore the wound if it is small

Q.72 **For approximately how long should a dog-bite wound be washed?**
कुत्ते के काटने के घाव को लगभग कितनी देर तक धोना चाहिए?

(A) 1 minute (B) 3 minutes
(C) 5 minutes (D) 15 minutes

Q.73 **What should be done after washing a potentially rabies-exposing dog bite?**
रेबीज के जोखिम वाले कुत्ते के काटने को धोने के बाद क्या करना चाहिए?

(A) Seek prompt medical assessment
(B) Wait several weeks
(C) Apply soil to the wound
(D) Avoid medical advice if the dog looks healthy

Q.74 **What is the correct position for a person with a nosebleed?**
नाक से खून आने पर सही स्थिति कौन-सी है?

(A) Head tilted backward (B) Sitting upright and leaning forward
(C) Lying flat with the head backward (D) Standing with the head hanging backward

Q.75 **Which part of the nose should be pinched during a typical nosebleed?**
सामान्य नकसीर में नाक के किस हिस्से को दबाना चाहिए?

(A) The bony bridge only (B) The forehead
(C) The soft part of the nose (D) The upper lip

Q.76 **What is recommended for initial cooling of a thermal burn?**
गर्म वस्तु से हुए जलने पर शुरुआती ठंडक देने के लिए क्या उचित है?

(A) Toothpaste (B) Butter
(C) Direct ice application (D) Cool running water

Q.77 **For approximately how long is a thermal burn commonly cooled with running water?**
गर्म वस्तु से हुए जलने को बहते पानी से लगभग कितनी देर ठंडा किया जाता है?

(A) 20 minutes (B) 2 minutes
(C) 3 minutes (D) 1 minute

Q.78 **Which of the following should NOT be applied directly to a burn?**
जलने पर सीधे क्या नहीं लगाना चाहिए?

(A) Appropriate clean covering after cooling (B) Toothpaste
(C) Cool running water (D) A suitable non-fluffy dressing

Q.79 **What is the conventional adult CPR compression-to-breath ratio?**
वयस्क CPR में सामान्य compression-to-breath ratio क्या है?

(A) 5:1 (B) 15:1
(C) 30:2 (D) 60:10

Q.80 **What is the recommended chest-compression rate during adult CPR?**
वयस्क CPR में छाती दबाने की अनुशंसित गति क्या है?

(A) 20–40 per minute (B) 40–60 per minute
(C) 60–80 per minute (D) 100–120 per minute

Q.81 **What is the recommended chest-compression depth for an average adult?**
औसत वयस्क में छाती दबाने की अनुशंसित गहराई कितनी है?

(A) Approximately 5–6 cm (B) Approximately 1 cm
(C) Approximately 2 cm (D) Approximately 10 cm

Q.82 **What should be done when an adult is unresponsive and is not breathing normally?**
जब कोई वयस्क बेहोश हो और सामान्य रूप से साँस न ले रहा हो, तो क्या करना चाहिए?

(A) Give food immediately (B) Activate emergency response and begin CPR
(C) Leave the person alone (D) Make the person stand

NURSING STUDY ZONE

Q.83 **What does CPR stand for?**
CPR का पूरा नाम क्या है?

(A) Clinical Pressure Recovery
(B) Cardiac Patient Response
(C) Cardiopulmonary Resuscitation
(D) Critical Pulse Regulation

Q.84 **The Heimlich manoeuvre is associated with which emergency?**
हेमलिक मैन्युवर किस आपात स्थिति से संबंधित है?

(A) Nosebleed
(B) Minor cut
(C) Simple fever
(D) Severe choking

Q.85 **Which technique is generally recommended first for a conscious adult with severe choking?**
गंभीर रूप से दम घुट रहे होश में वयस्क के लिए सामान्यतः कौन-सी तकनीक पहले अपनाई जाती है?

(A) Back blows
(B) Giving water
(C) Blind finger sweeping
(D) Asking the person to lie flat and sleep

Q.86 **Which technique may follow back blows if severe choking continues in an appropriate conscious adult?**
यदि गंभीर चोकिंग जारी रहे, तो उपयुक्त होश में वयस्क में बैक ब्लो के बाद कौन-सी तकनीक अपनाई जा सकती है?

(A) Chest massage only
(B) Abdominal thrusts
(C) Giving solid food
(D) Tilting the head backward

Q.87 **Which manoeuvre should NOT be used on an infant under one year?**
एक वर्ष से कम उम्र के शिशु पर कौन-सी तकनीक नहीं अपनानी चाहिए?

(A) Age-appropriate back blows
(B) Age-appropriate chest thrusts
(C) Abdominal thrusts
(D) Calling emergency services

Q.88 **What is the correct first-aid approach for suspected snakebite?**
साँप के काटने पर प्राथमिक उपचार का सही तरीका क्या है?

(A) Cut the wound
(B) Suck the venom
(C) Apply a tight tourniquet
(D) Keep the person still, immobilize the limb and seek urgent medical care

Q.89 **Which action should be avoided after a snakebite?**
साँप के काटने के बाद किस कार्य से बचना चाहिए?

(A) Cutting the wound
(B) Keeping the person calm
(C) Arranging urgent transport
(D) Immobilizing the affected limb

Q.90 **What should a rescuer do before touching a person who has received an electric shock?**
बिजली का झटका लगे व्यक्ति को छूने से पहले बचावकर्ता को क्या करना चाहिए?

(A) Pour water on the electrical source
(B) Ensure the electrical source is safely disconnected
(C) Immediately touch the person
(D) Pull the person with bare hands while the current is flowing

Q.91 **What should NOT routinely be done in a poisoning emergency?**
ज़हर खाने की आपात स्थिति में सामान्यतः क्या नहीं करना चाहिए?

(A) Identify the substance safely
(B) Seek emergency advice
(C) Induce vomiting without professional direction
(D) Monitor the person's condition

Q.92 **What is the first priority when approaching an emergency scene?**
आपात स्थिति के स्थान पर पहुँचने पर पहली प्राथमिकता क्या है?

(A) Take photographs
(B) Collect personal belongings
(C) Move every injured person immediately
(D) Ensure scene safety

Q.93 **What is the emergency response number in India?**
भारत में आपातकालीन सहायता का नंबर क्या है?

(A) 112
(B) 1000
(C) 555
(D) 200

Q.94 **What should be done first when a person faints but is breathing normally?**
यदि कोई व्यक्ति बेहोश हो जाए लेकिन सामान्य रूप से साँस ले रहा हो, तो क्या करना चाहिए?

(A) Give food immediately
(B) Help the person lie flat if safe and assess their condition
(C) Force the person to stand
(D) Pour a drink into the mouth

Q.95 **What should be done with a suspected fractured limb?**
हड्डी टूटने की आशंका वाले अंग के साथ क्या करना चाहिए?

(A) Forcefully straighten it
(B) Massage it vigorously
(C) Immobilize and support it
(D) Ask the person to run

Q.96 **What is the first priority in a suspected spinal injury?**
रीढ़ की हड्डी में चोट की आशंका होने पर पहली प्राथमिकता क्या है?

(A) Make the person sit immediately
(B) Twist the neck to test movement
(C) Ask the person to walk
(D) Avoid unnecessary movement and obtain emergency assistance

Q.97 **What is the main purpose of first aid?**
प्राथमिक उपचार का मुख्य उद्देश्य क्या है?

(A) Preserve life and prevent the condition from worsening
(B) Replace all hospital treatment
(C) Perform surgery at home
(D) Provide a definite diagnosis in every case

Q.98 **What should be done if a person becomes unconscious and is not breathing normally?**
यदि व्यक्ति बेहोश हो जाए और सामान्य साँस न ले रहा हो, तो क्या करना चाहिए?

(A) Give water
(B) Activate emergency services and start CPR
(C) Wait for one hour
(D) Give solid food

NURSING STUDY ZONE

Q.99 **Which is a warning sign of severe airway obstruction?**
वायुमार्ग में गंभीर रुकावट का संकेत कौन-सा है?

(A) Normal speech
(B) Effective coughing with normal breathing
(C) Inability to speak or breathe effectively
(D) Normal swallowing

Q.100 **What should be done if an object is not visible in a choking person's mouth?**
दम घुट रहे व्यक्ति के मुँह में वस्तु दिखाई न देने पर क्या करना चाहिए?

(A) Perform a blind finger sweep
(B) Push the object deeper
(C) Give solid food
(D) Avoid blind finger sweeps

Q.101 **Which action is appropriate after a burn caused by a hot liquid?**
गर्म तरल से जलने के बाद कौन-सा कार्य उचित है?

(A) Cool the burn under running water
(B) Apply cooking oil
(C) Break blisters
(D) Rub the skin vigorously

Q.102 **Which burn requires urgent medical assessment?**
किस प्रकार के जलने में तुरंत चिकित्सा जाँच की आवश्यकता होती है?

(A) A tiny area of temporary redness only
(B) An extensive or deep burn
(C) A harmless skin mark
(D) An old healed scar

Q.103 **Which action is appropriate for controlling bleeding from a simple external wound?**
साधारण बाहरी घाव से खून रोकने के लिए क्या उचित है?

(A) Apply soil
(B) Rub the wound
(C) Apply direct pressure with an appropriate clean dressing
(D) Ignore continuous bleeding

Q.104 **What should be done if a person has a severe electrical injury?**
गंभीर विद्युत चोट लगने पर क्या करना चाहिए?

(A) Allow the person to walk immediately
(B) Apply ice to the entire body
(C) Give food before assessment
(D) Obtain emergency care and assess breathing once the scene is safe

Q.105 **What is an important reason for washing a dog-bite wound thoroughly?**
कुत्ते के काटने के घाव को अच्छी तरह धोना क्यों महत्वपूर्ण है?

(A) It helps reduce contamination and rabies risk
(B) It guarantees that rabies cannot develop
(C) It replaces all medical assessment
(D) It eliminates the need for vaccination in every case

Q.106 **Which of the following is NOT appropriate first aid for a snakebite?**
साँप के काटने पर निम्नलिखित में से कौन-सा प्राथमिक उपचार उचित नहीं है?

(A) Reassuring the person
(B) Applying a tight tourniquet
(C) Keeping the affected limb still
(D) Seeking emergency medical care

Q.107 **Which statement about CPR is correct?**
CPR के बारे में कौन-सा कथन सही है?

(A) It is used only for fever
(B) It replaces emergency services
(C) It is an emergency intervention for cardiac arrest
(D) It should never be started before hospital arrival

Q.108 **What should be done with clothing stuck to a burn?**
जले हुए स्थान पर चिपके कपड़े के साथ क्या करना चाहिए?

(A) Pull it off forcefully
(B) Scrape the skin
(C) Rub it with oil
(D) Leave it in place and seek appropriate care

Q.109 **Which action is appropriate when helping a person with a nosebleed?**
नकसीर वाले व्यक्ति की सहायता करते समय क्या उचित है?

(A) Maintain pressure on the soft part of the nose
(B) Tilt the head backward
(C) Ask the person to blow the nose forcefully
(D) Repeatedly release pressure every few seconds

Q.110 **What is the role of an AED in cardiac arrest?**
कार्डियक अरेस्ट में AED की क्या भूमिका है?

(A) Measuring body weight
(B) Analysing heart rhythm and delivering a shock when indicated
(C) Treating all types of fever
(D) Measuring blood glucose only

SECTION 4: BIOMEDICAL WASTE MANAGEMENT (बायोमेडिकल वेस्ट प्रबंधन)

20 MCQs • Q.111 TO Q.130

Q.111 **Which colour category is used for anatomical waste under Indian biomedical waste rules?**
भारतीय बायोमेडिकल वेस्ट नियमों के अंतर्गत शारीरिक अंगों से संबंधित कचरे के लिए कौन-सी श्रेणी है?

(A) Blue
(B) Red
(C) Yellow
(D) White

Q.112 **Which colour category is used for specified contaminated recyclable plastic waste?**
निर्धारित दूषित रिसाइक्लेबल प्लास्टिक कचरे के लिए कौन-सी श्रेणी है?

(A) Yellow
(B) Blue
(C) White
(D) Red

NURSING STUDY ZONE

Q.113 **Which container is used for specified metallic sharps such as needles?**
सुई जैसे निर्धारित धातु के शार्प्स के लिए कौन-सा कंटेनर उपयोग किया जाता है?

(A) White translucent
(B) Yellow
(C) Blue
(D) Red

Q.114 **Which colour category is associated with specified contaminated glassware?**
निर्धारित दूषित काँच के सामान के लिए कौन-सी रंग श्रेणी है?

(A) Red
(B) Blue
(C) Yellow
(D) White

Q.115 **Where should biomedical waste be segregated?**
बायोमेडिकल कचरे को कहाँ अलग-अलग किया जाना चाहिए?

(A) Only at the final disposal site
(B) Only at the municipal office
(C) At the point where it is generated
(D) Only after mixing it with general waste

Q.116 **What type of container is required for contaminated metallic sharps?**
दूषित धातु के शार्प्स के लिए कैसा कंटेनर आवश्यक है?

(A) An ordinary paper bag
(B) An open cardboard box
(C) A thin plastic shopping bag
(D) A puncture-proof, leak-proof and tamper-proof container

Q.117 **Which of the following is an example of a sharp?**
निम्नलिखित में से कौन-सा शार्प का उदाहरण है?

(A) Needle
(B) Paper towel
(C) Food wrapper
(D) Cotton clothing without contamination

Q.118 **What does BMW stand for in healthcare?**
स्वास्थ्य सेवाओं में BMW का पूरा नाम क्या है?

(A) Basic Medical Work
(B) Biomedical Waste
(C) Blood Monitoring Work
(D) Biological Medicine Ward

Q.119 **Which item is commonly associated with the red biomedical waste category when contaminated and covered by the rules?**
दूषित होने और नियमों में शामिल होने पर कौन-सी वस्तु सामान्यतः लाल श्रेणी में आती है?

(A) Human anatomical tissue
(B) Metallic needle
(C) Specified recyclable plastic tubing
(D) Specified glass vial

Q.120 **Which category is generally used for blood-soaked dressings?**
खून से भीगी ड्रेसिंग के लिए सामान्यतः कौन-सी श्रेणी होती है?

(A) Blue
(B) Red
(C) White
(D) Yellow

Q.121 **Which of the following is an example of PPE?**
PPE का उदाहरण कौन-सा है?

(A) Protective gloves
(B) Patient food tray
(C) Hospital register
(D) Bedside table

Q.122 **What should healthcare workers avoid when handling used needles?**
इस्तेमाल की गई सुइयों को संभालते समय स्वास्थ्यकर्मियों को किससे बचना चाहिए?

(A) Using appropriate sharps containers
(B) Recapping contaminated needles by hand
(C) Wearing suitable PPE
(D) Following safety protocols

Q.123 **Which practice helps prevent the spread of infection from biomedical waste?**
बायोमेडिकल कचरे से संक्रमण फैलने से रोकने में कौन-सी प्रक्रिया मदद करती है?

(A) Mixing all waste together
(B) Leaving sharps uncovered
(C) Correct segregation and safe handling
(D) Throwing all waste into open areas

Q.124 **Which rules govern biomedical waste management in India?**
भारत में बायोमेडिकल वेस्ट प्रबंधन को कौन-से नियम नियंत्रित करते हैं?

(A) Motor Vehicles Rules only
(B) Income Tax Rules
(C) Electricity Rules only
(D) Biomedical Waste Management Rules, 2016, as amended

Q.125 **Which colour category is commonly associated with specified glass vials?**
निर्धारित काँच की वायल के लिए सामान्यतः कौन-सी श्रेणी होती है?

(A) Blue
(B) Red
(C) Yellow
(D) White

Q.126 **Which colour category is associated with specified contaminated plastic gloves?**
निर्धारित दूषित प्लास्टिक दस्तानों के लिए कौन-सी श्रेणी होती है?

(A) Yellow
(B) Red
(C) Blue
(D) White

Q.127 **What is the main purpose of biomedical waste segregation?**
बायोमेडिकल कचरे को अलग-अलग करने का मुख्य उद्देश्य क्या है?

(A) Increase waste mixing
(B) Make waste handling more dangerous
(C) Improve safety and appropriate disposal
(D) Eliminate the need for protective equipment

Q.128 **Which of the following belongs to the specified sharps category?**
निम्नलिखित में से कौन-सी वस्तु निर्धारित शार्प्स श्रेणी में आती है?

(A) Food waste
(B) Paper napkin
(C) Clean cardboard
(D) Contaminated metallic scalpel blade

NURSING STUDY ZONE

Q.129 **Why should general waste not be mixed with biomedical waste?**
सामान्य कचरे को बायोमेडिकल कचरे के साथ क्यों नहीं मिलाना चाहिए?

(A) It can increase exposure risks and complicate safe disposal
(B) It improves sterilization automatically
(C) It eliminates all pathogens
(D) It makes sharps harmless

Q.130 **Which statement about biomedical waste colour coding is correct?**
बायोमेडिकल वेस्ट कलर कोडिंग के बारे में कौन-सा कथन सही है?

(A) Every type of waste can go into any bin
(B) Waste must be segregated according to the applicable category and rules
(C) Colour coding is never necessary
(D) Needles can be thrown into ordinary open bins

SECTION 5: APPLIED HUMAN BIOLOGY & NUTRITION (अनुप्रयुक्त मानव शरीर क्रिया एवं पोषण) 45 MCQs • Q.131 TO Q.175

Q.131 **Deficiency of vitamin A may cause:**
विटामिन A की कमी से क्या हो सकता है?

(A) Scurvy (B) Beriberi
(C) Night blindness (D) Pellagra

Q.132 **Which disease is associated with vitamin B1 deficiency?**
विटामिन B1 की कमी से कौन-सा रोग होता है?

(A) Rickets (B) Scurvy
(C) Goitre (D) Beriberi

Q.133 **Vitamin C deficiency causes:**
विटामिन C की कमी से कौन-सा रोग होता है?

(A) Scurvy (B) Rickets
(C) Beriberi (D) Night blindness

Q.134 **Which disease is associated with vitamin D deficiency in children?**
बच्चों में विटामिन D की कमी से कौन-सा रोग होता है?

(A) Pellagra (B) Rickets
(C) Scurvy (D) Goitre

Q.135 **Deficiency of iodine may cause:**
आयोडीन की कमी से क्या हो सकता है?

(A) Scurvy (B) Beriberi
(C) Goitre (D) Night blindness

Q.136 **Which vitamin is essential for normal blood clotting?**
सामान्य रक्त का थक्का बनने के लिए कौन-सा विटामिन आवश्यक है?

(A) Vitamin C (B) Vitamin A
(C) Vitamin D (D) Vitamin K

Q.137 **Deficiency of vitamin B3 causes:**
विटामिन B3 की कमी से कौन-सा रोग होता है?

(A) Pellagra (B) Rickets
(C) Scurvy (D) Beriberi

Q.138 **Which nutrient is required for haemoglobin formation?**
हीमोग्लोबिन के निर्माण के लिए कौन-सा खनिज आवश्यक है?

(A) Iodine (B) Iron
(C) Sodium (D) Fluoride

Q.139 **Which vitamin supports calcium absorption and bone mineralization?**
कौन-सा विटामिन कैल्शियम के अवशोषण और हड्डियों के खनिजीकरण में मदद करता है?

(A) Vitamin C (B) Vitamin B1
(C) Vitamin D (D) Vitamin B3

Q.140 **Which vitamin is particularly important for collagen formation and wound healing?**
कोलेजन निर्माण और घाव भरने के लिए कौन-सा विटामिन विशेष रूप से महत्वपूर्ण है?

(A) Vitamin A (B) Vitamin D
(C) Vitamin K (D) Vitamin C

Q.141 **Deficiency of vitamin B12 may cause:**
विटामिन B12 की कमी से क्या हो सकता है?

(A) Megaloblastic anaemia and neurological problems
(B) Goitre only
(C) Rickets only
(D) Scurvy only

Q.142 **Which vitamin deficiency is associated with megaloblastic anaemia and is especially important to prevent neural tube defects?**
कौन-से विटामिन की कमी मेगालोब्लास्टिक एनीमिया से संबंधित है और गर्भावस्था में न्यूरल ट्यूब दोषों की रोकथाम के लिए विशेष रूप से महत्वपूर्ण है?

(A) Vitamin K (B) Vitamin B9 (Folate)
(C) Vitamin E (D) Vitamin A

Q.143 **Which of the following is a fat-soluble vitamin?**
निम्नलिखित में से कौन-सा वसा में घुलनशील विटामिन है?

(A) Vitamin C (B) Vitamin B1
(C) Vitamin E (D) Vitamin B12

Q.144 **Which mineral is required for thyroid hormone production?**
थायरॉइड हार्मोन के निर्माण के लिए कौन-सा खनिज आवश्यक है?

(A) Iron (B) Calcium
(C) Magnesium (D) Iodine

NURSING STUDY ZONE

Q.145 **Which condition is classically associated with oedema in severe malnutrition?**
गंभीर कुपोषण में सूजन (Oedema) किस स्थिति से पारंपरिक रूप से जुड़ी है?

(A) Kwashiorkor (B) Scurvy
(C) Rickets (D) Beriberi

Q.146 **Which condition is characterized by severe wasting due to prolonged inadequate energy intake?**
लंबे समय तक अपर्याप्त ऊर्जा मिलने से होने वाली गंभीर शारीरिक क्षीणता किस रोग की विशेषता है?

(A) Goitre (B) Marasmus
(C) Pellagra (D) Scurvy

Q.147 **Which mosquito is an important vector of dengue?**
डेंगू का प्रमुख वाहक कौन-सा मच्छर है?

(A) Culex (B) Female Anopheles
(C) Aedes (D) Sand fly

Q.148 **Which mosquito transmits malaria?**
मलेरिया का प्रसार कौन-सा मच्छर करता है?

(A) Aedes (B) Housefly
(C) Culex only (D) Infected female Anopheles

Q.149 **What is the causative agent of malaria?**
मलेरिया का कारक जीव कौन है?

(A) Plasmodium (B) Salmonella Typhi
(C) Vibrio cholerae (D) Rabies virus

Q.150 **Which microorganism causes typhoid fever?**
टाइफाइड बुखार किस सूक्ष्मजीव से होता है?

(A) Plasmodium vivax (B) Salmonella Typhi
(C) Mycobacterium tuberculosis (D) Dengue virus

Q.151 **Which test is historically associated with typhoid fever?**
टाइफाइड से संबंधित पारंपरिक जाँच कौन-सी है?

(A) ECG (B) EEG
(C) Widal test (D) MRI

Q.152 **Which microorganism causes tuberculosis?**
तपेदिक (TB) किस सूक्ष्मजीव से होता है?

(A) Vibrio cholerae (B) Salmonella Typhi
(C) Plasmodium (D) Mycobacterium tuberculosis

Q.153 **Which mosquito is associated with Japanese encephalitis transmission?**
जापानी एन्सेफलाइटिस के प्रसार से कौन-सा मच्छर जुड़ा है?

(A) Culex (B) Aedes only
(C) Sand fly (D) Housefly

Q.154 **Which vector transmits kala-azar?**
कालाजार का प्रसार कौन-सा वाहक करता है?

(A) Aedes mosquito (B) Sand fly
(C) Female Anopheles mosquito (D) Housefly

Q.155 **Which microorganism causes cholera?**
हैजा किस सूक्ष्मजीव से होता है?

(A) Mycobacterium tuberculosis (B) Salmonella Typhi
(C) Vibrio cholerae (D) Plasmodium

Q.156 **Which of the following is a common adult resting pulse-rate range?**
वयस्क की सामान्य आराम की नाड़ी दर कितनी होती है?

(A) 10–20 beats/minute (B) 30–40 beats/minute
(C) 120–160 beats/minute (D) 60–100 beats/minute

Q.157 **Which is a commonly taught average human body temperature?**
मानव शरीर का सामान्यतः पढ़ाया जाने वाला औसत तापमान कितना है?

(A) 37°C (B) 30°C
(C) 42°C (D) 25°C

Q.158 **Which is a commonly used reference value for adult blood pressure?**
वयस्क के रक्तचाप का सामान्यतः उपयोग किया जाने वाला संदर्भ मान कौन-सा है?

(A) 80/20 mmHg (B) 120/80 mmHg
(C) 200/150 mmHg (D) 40/10 mmHg

Q.159 **What is a commonly taught normal resting respiratory-rate range for adults?**
वयस्कों की सामान्य आराम की श्वसन दर कितनी मानी जाती है?

(A) 2–5 breaths/minute (B) 30–50 breaths/minute
(C) 12–20 breaths/minute (D) 50–70 breaths/minute

Q.160 **Which organ produces insulin?**
इंसुलिन का उत्पादन कौन-सा अंग करता है?

(A) Liver (B) Kidney
(C) Gallbladder (D) Pancreas

Q.161 **What is the functional unit of the kidney?**
गुर्दे की क्रियात्मक इकाई क्या है?

(A) Nephron (B) Neuron
(C) Alveolus (D) Osteon

Q.162 **What is the functional unit of the nervous system?**
तंत्रिका तंत्र की क्रियात्मक इकाई क्या है?

(A) Nephron (B) Neuron
(C) Alveolus (D) Platelet

Q.163 **What is the smallest bone in the human body?**
मानव शरीर की सबसे छोटी हड्डी कौन-सी है?

(A) Femur (B) Tibia
(C) Stapes (D) Humerus

Q.164 **What is the longest bone in the human body?**
मानव शरीर की सबसे लंबी हड्डी कौन-सी है?

(A) Radius (B) Ulna
(C) Fibula (D) Femur

NURSING STUDY ZONE

Q.165 **How many chambers does the human heart have?**
मानव हृदय में कितने कक्ष होते हैं?

(A) Four (B) Two
(C) Three (D) Five

Q.166 **How many chromosomes are present in most normal human body cells?**
अधिकांश सामान्य मानव शारीरिक कोशिकाओं में कितने गुणसूत्र होते हैं?

(A) 23 (B) 46
(C) 44 (D) 48

Q.167 **What is the largest internal organ of the human body?**
मानव शरीर का सबसे बड़ा आंतरिक अंग कौन-सा है?

(A) Heart (B) Kidney
(C) Liver (D) Pancreas

Q.168 **Which organ produces bile?**
पित्त का उत्पादन कौन-सा अंग करता है?

(A) Gallbladder (B) Pancreas
(C) Kidney (D) Liver

Q.169 **Which organ stores bile?**
पित्त को कौन-सा अंग संग्रहित करता है?

(A) Gallbladder (B) Liver
(C) Spleen (D) Stomach

Q.170 **Where does most nutrient absorption occur?**
अधिकांश पोषक तत्वों का अवशोषण कहाँ होता है?

(A) Large intestine (B) Small intestine
(C) Oesophagus (D) Mouth only

Q.171 **Which blood component carries oxygen using haemoglobin?**
हीमोग्लोबिन की सहायता से ऑक्सीजन कौन-सा रक्त घटक ले जाता है?

(A) Platelets (B) Plasma only
(C) Red blood cells (D) White blood cells

Q.172 **Which blood component plays an important role in clot formation?**
रक्त का थक्का बनाने में कौन-सा घटक महत्वपूर्ण भूमिका निभाता है?

(A) Red blood cells (B) Neurons
(C) Plasma water only (D) Platelets

Q.173 **Which blood cells help defend the body against infection?**
शरीर को संक्रमण से बचाने में कौन-सी रक्त कोशिकाएँ मदद करती हैं?

(A) White blood cells (B) Red blood cells
(C) Platelets (D) Osteocytes

Q.174 **Which nutrient improves the absorption of non-haem iron from plant foods?**
पौधों से मिलने वाले नॉन-हीम आयरन के अवशोषण को कौन-सा पोषक तत्व बेहतर बनाता है?

(A) Vitamin D (B) Vitamin C
(C) Vitamin K (D) Vitamin B12

Q.175 **Which vitamin is fat-soluble?**
निम्नलिखित में से कौन-सा विटामिन वसा में घुलनशील है?

(A) Vitamin B1 (B) Vitamin C
(C) Vitamin A (D) Vitamin B12

SECTION 6: BEHAVIORAL QUESTIONS & NURSING ETHICS (व्यवहार संबंधी प्रश्न एवं नर्सिंग नैतिकता) 25 MCQs • Q.176 TO Q.200

Q.176 **A patient is afraid of receiving an injection. What should the nurse do?**
एक मरीज इंजेक्शन लगवाने से डर रहा है। नर्स को क्या करना चाहिए?

(A) Scold the patient
(B) Ignore the patient's fear
(C) Threaten the patient
(D) Explain the procedure calmly and reassure the patient

Q.177 **What does patient confidentiality mean?**
मरीज की गोपनीयता का क्या अर्थ है?

(A) Protecting the patient's medical information from unauthorized disclosure
(B) Sharing every patient's report publicly
(C) Discussing patient details with friends
(D) Posting medical records on social media

Q.178 **What does patient advocacy mean?**
मरीज के हितों की पैरवी (Patient Advocacy) का क्या अर्थ है?

(A) Ignoring patient preferences
(B) Protecting the patient's rights, safety and interests
(C) Making every decision without the patient
(D) Refusing to answer patient questions

Q.179 **Which ethical principle means avoiding harm?**
हानि से बचने के नैतिक सिद्धांत को क्या कहते हैं?

(A) Autonomy (B) Justice
(C) Non-maleficence (D) Veracity

Q.180 **Which ethical principle respects a patient's right to make informed decisions?**
मरीज के सूचित निर्णय लेने के अधिकार का सम्मान करने वाला नैतिक सिद्धांत कौन-सा है?

(A) Fidelity (B) Justice
(C) Beneficence (D) Autonomy

NURSING STUDY ZONE

Q.181 **Which ethical principle means acting to promote the patient's well-being?**
मरीज के कल्याण के लिए कार्य करने का नैतिक सिद्धांत कौन-सा है?

(A) Beneficence
(B) Autonomy
(C) Veracity
(D) Confidentiality

Q.182 **Which ethical principle emphasizes fairness?**
निष्पक्षता पर जोर देने वाला नैतिक सिद्धांत कौन-सा है?

(A) Fidelity
(B) Justice
(C) Autonomy
(D) Non-maleficence

Q.183 **Which ethical principle means truthfulness?**
सत्य बोलने के नैतिक सिद्धांत को क्या कहते हैं?

(A) Autonomy
(B) Justice
(C) Veracity
(D) Beneficence

Q.184 **What does patient privacy primarily protect?**
मरीज की प्राइवेसी मुख्य रूप से किसकी रक्षा करती है?

(A) Hospital profits
(B) Staff schedules
(C) Medical equipment
(D) Personal space and bodily dignity

Q.185 **What should a nurse do if a patient does not understand a proposed procedure?**
यदि मरीज किसी प्रस्तावित प्रक्रिया को नहीं समझता, तो नर्स को क्या करना चाहिए?

(A) Help the patient obtain an appropriate explanation
(B) Force the patient to agree
(C) Ignore the patient's questions
(D) Sign consent on the patient's behalf without authorization

Q.186 **Which action demonstrates empathy?**
कौन-सा कार्य सहानुभूतिपूर्ण समझ (Empathy) दर्शाता है?

(A) Laughing at a patient's fear
(B) Trying to understand the patient's feelings
(C) Ignoring emotional distress
(D) Blaming the patient

Q.187 **Which action helps protect patient privacy during an examination?**
जाँच के दौरान मरीज की प्राइवेसी की रक्षा करने के लिए क्या करना चाहिए?

(A) Allow unnecessary observers
(B) Leave the patient uncovered
(C) Close curtains and provide appropriate covering
(D) Discuss the examination publicly

Q.188 **What should a nurse do after noticing a serious patient-safety risk?**
मरीज की सुरक्षा से जुड़ा गंभीर जोखिम दिखाई देने पर नर्स को क्या करना चाहिए?

(A) Hide the information
(B) Ignore the risk
(C) Blame the patient immediately
(D) Report the concern through the appropriate safety process

Q.189 **Which action is appropriate when administering medication?**
दवा देते समय कौन-सा कार्य उचित है?

(A) Check the correct patient, medicine, dose and route according to protocol
(B) Give an unidentified tablet
(C) Ignore known allergies
(D) Administer medicine without checking the order

Q.190 **What is informed consent?**
सूचित सहमति (Informed Consent) क्या है?

(A) A patient being forced to accept treatment
(B) A process in which the patient receives relevant information and voluntarily agrees
(C) A nurse making every decision without discussion
(D) A verbal order from any visitor

Q.191 **Which patient generally requires the most urgent assessment?**
निम्नलिखित में से किस मरीज का आकलन सबसे पहले करना चाहिए?

(A) A stable patient requesting a routine report
(B) A patient asking for visiting hours
(C) A patient with severe breathing difficulty
(D) A patient waiting for a routine appointment

Q.192 **Which quality helps build trust between a nurse and a patient?**
नर्स और मरीज के बीच विश्वास बनाने में कौन-सा गुण मदद करता है?

(A) Dishonesty
(B) Impatience
(C) Indifference
(D) Honest and respectful communication

Q.193 **What does fidelity mean in nursing ethics?**
नर्सिंग नैतिकता में Fidelity का क्या अर्थ है?

(A) Maintaining professional commitments and trust
(B) Ignoring responsibilities
(C) Sharing confidential information
(D) Disregarding patient preferences

Q.194 **What should a nurse do if asked to perform a procedure beyond their competence?**
यदि नर्स से उसकी क्षमता से बाहर की प्रक्रिया करने को कहा जाए, तो उसे क्या करना चाहिए?

(A) Perform it without preparation
(B) Seek appropriate assistance and follow professional protocols
(C) Pretend to have the required competence
(D) Ignore patient safety

NURSING STUDY ZONE

Q.195 **Which action demonstrates respect for a patient's dignity?**
कौन-सा कार्य मरीज की गरिमा का सम्मान दर्शाता है?

(A) Mocking the patient's beliefs
(B) Ignoring the patient's preferences
(C) Providing respectful care without discrimination
(D) Discussing private matters publicly

Q.196 **Which action is appropriate when speaking about a patient's condition?**
मरीज की स्थिति के बारे में बात करते समय कौन-सा कार्य उचित है?

(A) Discuss it with anyone who asks
(B) Share it on social media
(C) Reveal details in a public corridor
(D) Discuss it only with authorized people for appropriate care purposes

Q.197 **Which communication style is most appropriate for a distressed patient?**
परेशान मरीज से बात करने का सबसे उचित तरीका कौन-सा है?

(A) Calm, respectful and understandable communication
(B) Angry shouting
(C) Threatening language
(D) Deliberately confusing explanations

Q.198 **What should a nurse do when a patient raises a valid concern about their care?**
यदि मरीज अपनी देखभाल के बारे में उचित चिंता व्यक्त करे, तो नर्स को क्या करना चाहिए?

(A) Dismiss the concern
(B) Listen carefully and respond appropriately
(C) Punish the patient
(D) Refuse all communication

Q.199 **Which principle requires fair treatment of patients?**
मरीजों के साथ निष्पक्ष व्यवहार किस नैतिक सिद्धांत के अंतर्गत आता है?

(A) Fidelity
(B) Veracity
(C) Justice
(D) Autonomy

Q.200 **What is the most appropriate overall approach to nursing care?**
नर्सिंग देखभाल का सबसे उचित समग्र दृष्टिकोण क्या है?

(A) Focus only on paperwork
(B) Ignore emotional needs
(C) Treat patients without respecting their rights
(D) Provide safe, compassionate, respectful and patient-centred care
